

Cambridge, July 18, 1893.

Dear Sir,

I have made what I hope is not too  
tardy a response to your letter of May 13<sup>th</sup> by  
sending today to Professor Mendenhall a short  
paper on "Iron for Transformers" for the Electrical

Congress at Chicago.

Yours

Wm. S. Atwood

POST

Jackson Park U.S.A. del

Sir J. A. Ewing.

LANGDALE LODGE,  
CAMBRIDGE.

18 Feb 1899

Dear Thompson,

I hope you got my  
note about Macgregor's  
R. S. Certificate & that you  
have had it "re-suspended".  
I shall sign it next time I  
am at Burlington House.

Are you disposed to sign  
a proposal for Edward Hopkins?  
I am surprised to find he is

not F. R. S. already. As joint-  
author of the magnetic circuit

I think he has a mighty

strong claim. I am circulating

his paper & shall send it to you

if you say "yes". There are

only a few days available for

circulating it, as the

last day for being in is

March 2. If you had

it on Feb 23 could you get

some signatures at a Council  
meeting of the Inst. Elect. Engineers?

Yours very truly

L. A. Dunning
